PHARMAVAIL BENEFIT MANAGEMENT Custom Rx Formulary

Please bring this guide with you on your next doctor visit.

The **PHARMAVAIL'S EVIDENCE-BASED Rx Formulary** is a formulary list of medications that may be covered under your prescription drug plan. This list was reviewed by an independent group of practicing doctors and pharmacists, and it contains medications made by most pharmaceutical manufacturers. It includes medications for many covered conditions.

BE SURE TO BRING THIS GUIDE WITH YOU ON EVERY VISIT TO YOUR DOCTOR

Please note: This guide does not contain a complete list of preferred drugs. It only lists the *most commonly prescribed drugs*.

KEEPING COSTS DOWN SO YOUR COVERAGE CONTINUES

Often, your doctor can choose among several drugs to treat a condition, and your plan may prefer some medications over others. These are called *preferred drugs*, and using them helps keep costs down for your plan sponsor. This in turn helps ensure that your plan will provide coverage for the medications you need in the years ahead.

In many cases, using these preferred drugs can also save you money now. For example, brand-name drugs may have generic versions that may have a lower co-payment/co-insurance.

FINDING MEDICATIONS WITH LOWER CO-PAYMENTS/CO-INSURANCE

This guide lists medications two ways to help you find some generic, preferred, and nonpreferred brand-name drugs.

SECTION I - ALPHABETICALLY BY DRUG CATEGORY (SUCH AS RESPIRATORY)

Within each category, medications are listed in alphabetical order, with generic, preferred brand-name drugs, and nonpreferred brand-name drugs sorted separately:

- G Means a preferred generic medication
- P Means a preferred brand-name medication
- NP Means a nonpreferred brand-name medication
- NC Means Not Covered

SECTION II - ALPHABETICALLY BY BRAND NAME

After each nonpreferred brand-name drug, you will find possible generic and preferred brand-name alternatives.

SAFETY CONSIDERATION SYMBOLS

Here is a quick guide for you and your doctor.

Means weigh risk of birth defects or other adverse outcomes.

Means do not use in pregnancy.

The information in this guide was in effect at the time of printing and maybe subject to change.
